## World Threat Landscape

Cyber Threat Level

Guarded

### General situation

**Galactic Influences:** Unidentified cosmic signals intercepted; scientists suspect a benign origin but continue monitoring.

**Digital Pranks & Hoaxes:** A wave of automated prank calls has targeted businesses in Atlantis, causing minor disruptions. Meanwhile, an anonymous group leaked details of an outdated teleportation algorithm.

**Software Glitches:** Increased reports of self-aware toasters refusing to heat bread properly. Experts recommend firmware updates to restore compliance.

## Threat Hunting

We have analyzed digital pet applications, which have shown unexpected behavior after recent updates. Investigating these anomalies has given us a deeper understanding of how virtual pets interact with user environments.

As part of our research, we reviewed all installed digital pet applications. Suspicious behavior was flagged, and updates were assessed for security concerns.

it was cool!

## Recent cyberattacks

### Massive Pie-Throwing Robot Malfunction Mitigated by SOC

In January 2025, automated pie-throwing machines in various amusement parks worldwide malfunctioned, unexpectedly launching pies at random visitors. Experts suspect a software glitch rather than sabotage. Engineers are working on a patch.

### Fake Wizard Spotted in Virtual Reality Chatrooms

Multiple reports indicate a virtual reality imposter claiming to be 'The Grand Cyber-Wizard' has been misleading users with fake spells and enchanted phishing links. Users are advised not to accept any mysterious 'quests' without verification.

### Spam Messages Promoting Intergalactic Cruises Mitigated by SOC

Users have reported receiving spam messages advertising 'once-in-a-lifetime' space cruises at suspiciously low prices. While space travel remains expensive, these messages are likely a scam. Authorities are investigating the origin of these dubious offers.

## Take away of the month

"Stay alert for digital oddities. If something seems too magical or futuristic to be true, it probably is."  
Dr. Orion Nebula
